SCOPE OF SERVICES

ELECTRONIC POLL BOOK SYSTEM Request For Proposal

Luzerne County, Pennsylvania is seeking qualified providers of an Electronic Poll Book System.

Luzerne County uses the State of Pennsylvania Statewide Uniform Registry of Electors (SURE) Voter Registration System.

The SURE Voter Registration System will be the source of all information necessary for loading Electronic Poll Books (EPB) and will be the collection point for voter history from polling places using EPBs. To accomplish this, vendors will have to provide/develop a file format for use in transfer of information by and between their system and the SURE Voter Registration System. Vendors are encouraged to define their minimum expectations of what such a file format would look like to enable this data exchange.

Luzerne County is considering an initial purchase of 220 electronic poll book units, with an option to purchase more units within the next 12 months. This should not be construed as a commitment to purchase in this volume and vendors should be aware that this number could be higher or lower depending upon unit costs.

Each of the 220 electronic poll book units will support a thermal printer.

Requirements

Luzerne County is interested in what the market has to offer and will look for the best combination of features, functions and cost in making an award.

All vendors providing a proposal, must be able to accommodate the County's anticipation of a soft roll out of products for use in 30% of the precincts, in the May 15th, 2018 General Primary.

At minimum, an EPB system should provide a baseline set of features, functions and benefits including but not limited to the following:

- Be easy to use and reduce the amount of time it takes to process a voter.
- Provide information necessary to verifying a voter's identity and guide the process of doing so.
- Allow for a search based on name, date of birth, address, voter ID
- Where multiple EPB's are deployed at the same voting site, prevent a voter from checking in at different stations.
- Provide a mechanism for updating the SURE Voter Registration System.
- Help prevent poll worker errors from being made.
- Be secured from unauthorized access.
- Be capable of operating during power outages.
- Be capable of directing voters to the correct polling place anywhere in the county.
- Provide at least a 10" diagonal screen dimension
- Provide at least 10 hours of integral battery backup within the tablet or laptop.
- Provide a thermal printer with integral battery backup of at least six hours.

- For how many years has your company directly offered an electronic poll book solution?
- Number of people directly employed by your company (do not include contractors).
- Does your company provide onsite troubleshooting service on Election Day? At what cost?
- If Luzerne County would purchase an EPB system from your company, who would install and support the system? Provide specific details.

- Can data be recovered quickly from an EPB that has fully failed during operations?
- If the voter is considered having voted but we know that they have not, can we override the system to allow a vote to take place (cancel voter validation)? Describe how this is accomplished using your system.
- Does the system maintain information on absentee ballots requested and returned?
- What information is downloaded to the EPB to support an election?
- What search functions are provided to find a voter, appropriate voting location or ballot within a location with multiple ballots?
- Explain the steps required to search for a voter using the EPB unit. Include and outline all steps necessary to find a voter who belongs in the specific precinct location.
- Does the EPB unit refine the initial lookup step so just voters in the precinct or voting location where the EPB is located appear on the electronic poll book screen, or are other voter names from outside the respective voting location presented on the screen as well?
- Can your EPB system process Provisional voters? If so, please describe this process in detail.
- What hardware platform is used to support your EPB software? Provide the specific manufacturer and model number of the hardware used.

- Does the system time stamp significant activities such as time of voter check in?

- Can a list of all voters validated in each respective precinct be printed using your electronic poll book? Can this list be printed immediately following the close of the polls on Election Day?
- Are procedural or process controls included that aid the poll worker for each situation they may encounter?

Interface to Tabulation System

- Luzerne County currently uses the iVotronic touch screen tabulation system, which uses a Personalized Electronic Ballot (PEB) device to designate the ballot style at each precinct. Does your EPB system provide the capability to automatically program devices to designate ballot style on tabulation systems for each individual voter? Please list the tabulation system and the interface used with the tabulation system. If the EPB interfaces with multiple tabulation systems, please list all systems.
