After doing some research on Jennifer Morrell and The Election Group, I strongly oppose Luzerne County spending 70K to hire them. Unlike the claim that they are non-partisan, they are actually a left-winged group who most recently tried to destroy the Arizona Election audit. In an article in The Gateway Pundit, Jim Holt exposes Morrell as being one of Arizona State's corrupt Secretary of State's observers who tried to destroy the Cyber Security Group involved in the audit. Morrell and The Election Group were involved in Georgia's 2020 election and declared Georgia's election safe and secure. This alone give as a glimpse of Morrell's political leanings and integrity. According to the Tennessee Star, "Voters of Fulton County urged the county commissioners not to approve a contract with this group who is tied to Mark Zuckerberg and the Center for Civic Design." A quick search of this left-winged group shows Jennifer Morrell listed on the advisory committee along with former Pennsylvania Secretary of State Kathy Boockvar. Not surprisingly, Morrell wrote a letter to the PA House of Representatives State Government Committee stating "some good examples of statewide election rules and procedures include Arizona, Colorado, Michigan and Pennsylvania."

Jennifer Morrell and The Election Group were in the middle of the Democrats' 2020 election plan. This group was involved before the election, during the election and now after the election. If Luzerne County hires Morrell and this group, we better guard our ballots and say goodbye to fair elections.
