

## **Area Agency on Aging Active Adult Centers Offering Flu Vaccinations**

Flu season is quickly approaching and for many, including those over age 65 and those who have certain medical conditions, getting the flu can cause a host of flu-related complications. One of the best ways to prevent the flu is by getting vaccinated. (Please note that it is best to consult your doctor prior to receiving the vaccination especially if you have questions regarding whether or not the flu shot is right for you.) If you are interested in receiving a flu vaccination, they will be available for those 50+ years of age at the Area Agency on Aging Active Adult Centers throughout September and October for Luzerne and Wyoming Counties. Pre-registration is required and please bring your insurance/Medicare cards with you.
